DEVELOPING A LITERAL AND PROSPER WORLD

DR. SYED MAHBOOB HASSAN NIZAMI

Chairman Message

Indeed the service of mankind is the duty that every member of society should fulfill.

With so many challenges like Covid-19, Crisis, Disasters, Conflicts and Social Problems,

What can we do to improve the Peace, Stability, Prosperity in this ever-changing world?

How can we sustain our economy? How can we attain the certainty of a better and bright future?

The answer to all these questions is investing in the people as we know nothing returns such great dividends than investing in people does. When we Educate, Empower our people to produce, govern and grow in this world, they become the most powerful resource in the world.

Our organization believes nothing can be done without the help of people like you.

It is a non-political organization solely working for strengthening the poor and needy ones in all areas of life. Our aim is to go a long way in Improving Health, Promoting Education,

Supporting Sustainable Development Goals of United Nations, Empowering especially Women thus creating a prosper, literal and bright world.

In the end I would like to acknowledge the dedication and hard work of our Board members.

Togetherness has the power to bring progress and success to our existence and endeavors respectively. United we shall carve our promising future for our future generations.

راحتِ قلب و جاں ہے، خدمتِ خلق میں
اگر چہ دشواریاں ہیں بہت اس سفرِ خیر میں

Mission

DEVELOPING A LITERAL AND PROSPER WORLD

Vision

Nizami Health & Educational Welfare Organization is devoted to the highest standard of welfare work in all areas of life delivered with care, trust and understanding for humanity .

Introduction

Nizami Health & Educational welfare Organization is a registered non-governmental organization which was formed when a group of likeminded individuals formally joined hands for serving the humanity irrespective of religion, race, ethnicity and region. Nizami Health & Educational welfare Organization is operating on national and international levels and focuses on eradication of illiteracy, poor health, discrimination of any form and securing the human rights.

Nizami Organization is Registered under the Voluntary Social Welfare Agencies Ordinance 1961 Social Welfare Department, Government of Sindh & it is also Registered under United Nations (UN), Department of Economic & Social Affairs (DESA) as a Welfare Organization.

Aims and Objectives:

- 1 To provide and spread Primary, Secondary and Higher Education by establishing and/or collaborating with Schools, Colleges. Institutions, Libraries and more.
- 2 To support, establish and maintain Shelters, Industrial Homes, Technical Training Centers for Women, Orphans, Disabled and Unskilled People.
- 3 To establish and/or maintain Hospitals, Clinics, Medical Centers, Medical Camps in Urban, Sub-Urban and Rural areas.
- 4 To endorse the Human Rights in particular the rights of the Children, Women and Trans genders.
- 5 To ensure and support Women Empowerment in Social, Political and Economical aspects of life.
- 6 To organize Seminars, Conferences, Culture Appreciation Events and Programs, Awards Distribution Ceremonies, on national and international levels for the appreciation and support of people.
- 7 To support, establish and maintain Public Private Partnerships.
- 8 To understand the social causes behind drugs abuse, raising awareness about Addiction of any type and helping Addicts to achieve, maintain and sustain a healthy life.
- 9 To promote and create understanding of Animals Well-being at the heart of the society.
- 10 To sustain and maintain the lives of less privileged and deprived people.
- 11 Implementation and promotion of 17 Sustainable Development Goals of United Nations.
- 12 To provide Free Ambulances Services especially in Sindh region and also all over the Pakistan .

SUSTAINABLE DEVELOPMENT GOALS

What is the meaning of Sustainable Development Goals?

The **Sustainable Development Goals (SDGs)**, also known as the Global Goals, were adopted by all United Nations Member States in 2015 as a universal call to action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity by 2030.

75th Anniversary Of United Nations

Nizami Health and Educational Welfare Organization celebrated the 7th Birthday of United Nations at Pearl Continental Hotel, Karachi.

Member of National Assembly and Ministry of Inter Provincial Coordination Saima Nadeem cut the cake. She also distributed the books among executive members and appreciated the efforts of team of Nizami Organization.

24 October 2020

**Pre- programme panel discussion and board meeting on United Nations Day Celebration with Seminar on Awareness of United Nations' Sustainable Development Goals SDG's
9th September 2018 at Marriott Hotel, Karachi**

Pictures of Chairman and Founder of Nizami Organization Dr. Syed Mahboob Hassan Nizami at "Fakhar e Naujawan Awards Distribution Ceremony". The ceremony was held on the theme of Defense Day and the aim of this event was to support Youth Development and Sustainable Development Goals (SDGs) of United Nations

Nizami Organization and **Thara Foundation** aims to empower The Youth
 Empowering The Youth means creating a positive change and creating the
 positive change means building a better and bright world place for the
 younger and future generations and humanity at large
 We seek to find the underprivileged youth to sustain their lives thus
 sustaining and developing the prosper life for each and everyone

Why Sustainable Development Goals- SDGs are important for Pakistan?

The 17 Sustainable Development Goals (SDGs), with their 169 targets and 230 indicators, form the core of the 2030 Agenda. These all goals balance the economic, social and ecological dimensions of sustainable development, and place the fight against poverty and extreme hunger.

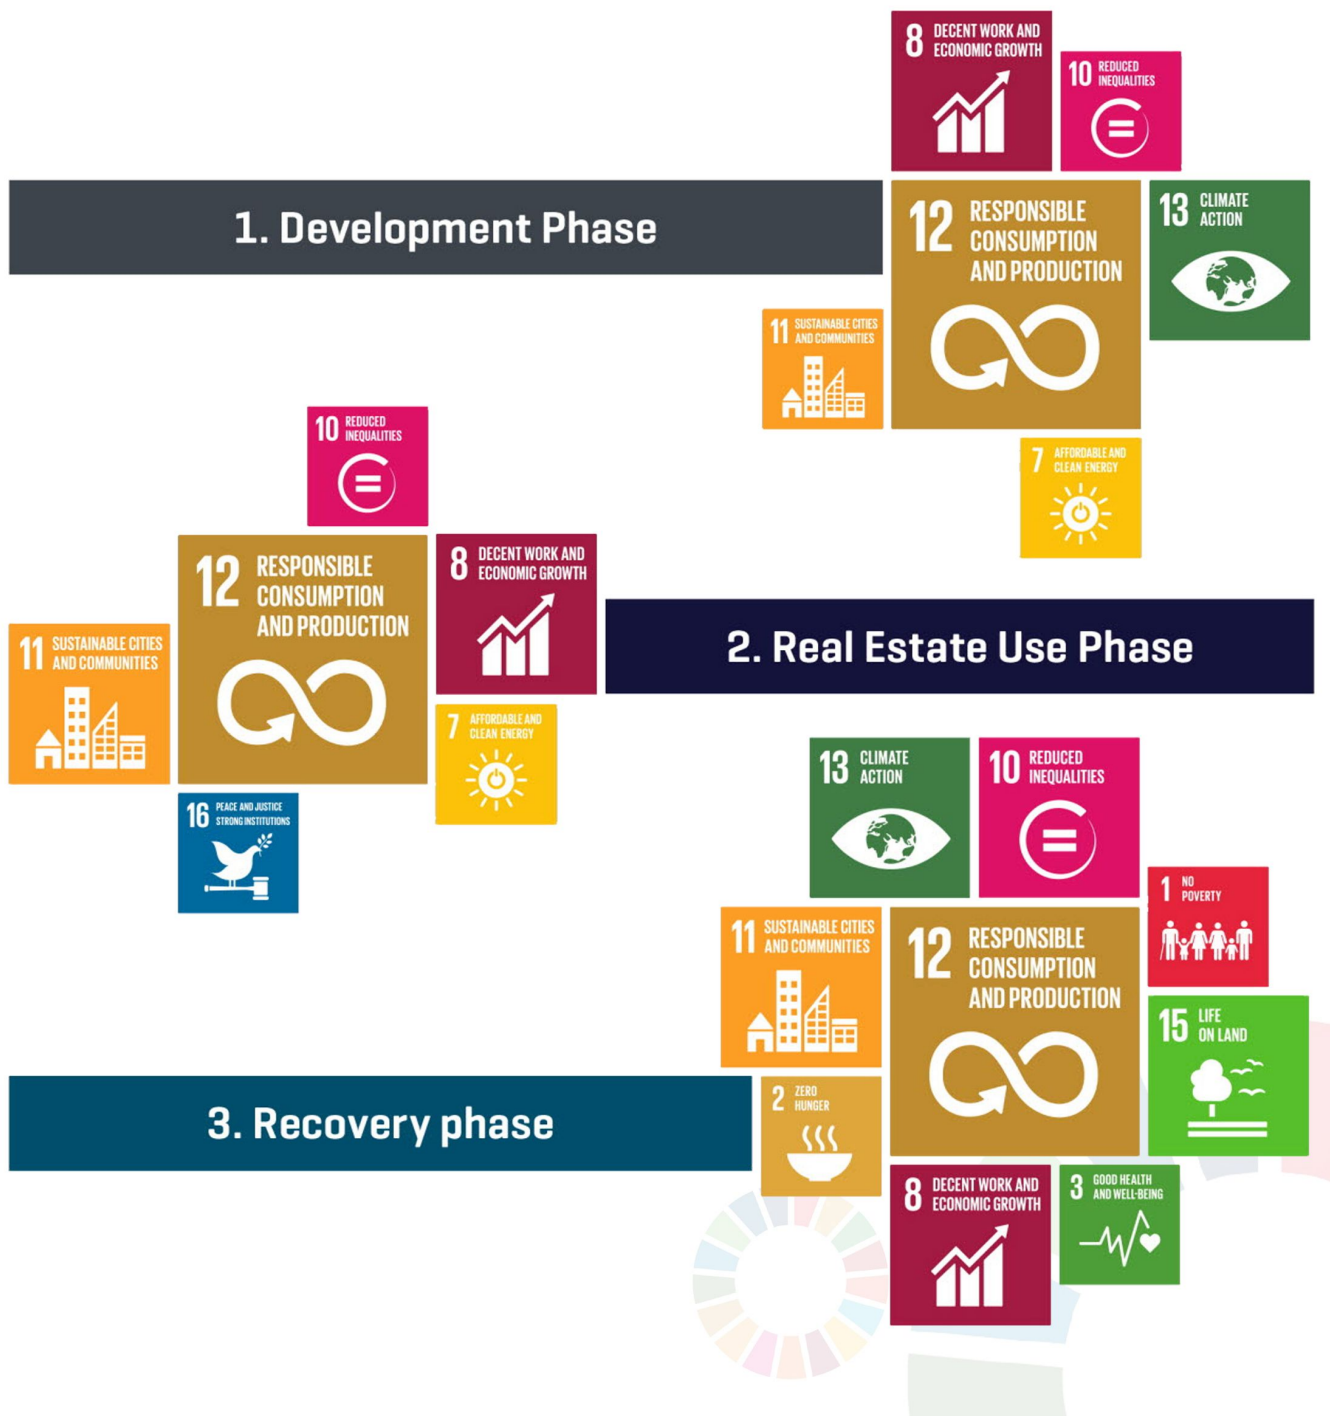

169 targets
230 indicators

All SDGs Goals are to be achieved around the world, and by all UN member states, by 2030. This means that all states have to play their part equally in finding shared solutions to the world's urgent challenges and crises. Pakistan is also required to implement All 17 Goals on a national basis. In addition, incentives are to be created to encourage non-governmental actors to make an increasingly active contribution to Sustainable Development Goals- SDGs.

Sustainable Development Goals - SDGs and Business with different phases to implement in real life scenarios.

SDGs for Youth in Pakistan

How are young people contributing to the SDGs?

Research shows that young women and men are already contributing substantially towards the SDGs in the following ways:

DELIVERY

Helping deliver programs which are responsive to real needs and often in ways that benefit in terms of economy, efficiency, effectiveness, equity and sustainability. Yet much more needs to be done to track and monitor this, including purposively designed comparative studies.

INFLUENCING

Their ability to influence their parents, their communities and local and national government. Young people don't just want to be peer educators—they can be highly effective educators, advisors, and managers across generations.

ABILITIES

The ability of young women and men to seek out partnerships, network and build alliances, both within and between generations.

CAPABILITIES

Their capabilities to contribute towards development policies or legislation that supports the achievement of all 17 SDGs.

SDGs and Climate Change

Take urgent action to combat climate change and its impacts

SEVERITY OF **NATURAL DISASTERS**

AFFECTING MORE THAN
39 MILLION PEOPLE
IN 2018

Facts and Figures

Extreme poverty rates have been cut by more than half since 1990. While this is a remarkable achievement, one in five people in developing regions still live on less than \$1.90 a day. Poverty is more than the lack of income and resources; it also means hunger and malnutrition, limited access to education and other basic services, social discrimination and exclusion, and the lack of participation in decision-making. Economic growth must be inclusive to provide sustainable jobs and promote equality.

What you think about this goal?

How to reduce Poverty?

Prioritising the health needs of the poor will directly improve SDG 3 targets.

1. Increase employment
2. Raise average pay
3. Paid family and sick leave
4. Invest in high quality childcare
5. Immigration reform
6. End daily taxes

How you can resolve this issue in five steps?

Facts and Figures

Our soils, freshwater, oceans, forests and biodiversity are being rapidly degraded. Many rural women and men can no longer make ends meet on their land, forcing them to migrate to cities in search of opportunities. A profound change of the global food and agriculture system is needed to nourish today's 815 million hungry and the additional 2 billion people expected by 2050. If done right, agriculture, forestry and fisheries can provide nutritious food for all and generate decent incomes, while supporting people-centered rural development and protecting the environment.

How to reduce Hunger?

Addressing the causes and consequences of all forms of malnutrition will have a direct impact on SDG 3 health targets.

1. Sustainable Food
2. Transform agriculture sector
3. Access to Credit for farmer
4. Food Donations
5. Urban Farming
6. Access to Education
7. Social Change

What you think about this goal?

How you can resolve this issue in five steps?

Facts and Figures

Since 2000, impressive progress has been made on many health fronts. However, to meet the SDG health targets by 2030, progress must be accelerated and expanded, in particular in regions with the highest burden of disease. Areas that deserve special attention include mortality rates for children under five years of age, unintended pregnancies particularly among adolescents, reducing infectious diseases related with lack of safe water, sanitation and hygiene (WASH) services, premature deaths due to non-communicable diseases, mental disorders such as depression, tobacco and alcohol use, and indoor and ambient air pollution. Health systems strengthening and funding are also key to achieving SDG3.

How to improve Health?

1. Improve primary care
2. Change in consumption patterns
3. Be water-wise
4. Be active in conservation efforts
5. Reduce plastic use
6. Physical Activity and Nutrition

What you think about this goal?

How you can resolve this issue in five steps?

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins or other markings on the paper.

Facts and Figures

Achieving inclusive and equitable quality education for all will require increasing efforts, especially in sub-Saharan Africa and Southern Asia and for vulnerable populations, including persons with disabilities, indigenous people, refugee children and poor children in rural areas. Despite considerable gains in education enrolment over the past 15 years, many children do not acquire basic reading and mathematical skills at the end of their primary education. Equity issues within countries are also a major challenge. This goal ensures that all girls and boys complete free primary and secondary schooling by 2030.

What you think about this goal?

How you can resolve this issue in five steps?

Improving Education by:

1. Expand access to high-quality early childhood education programs
2. Focus on recruiting, training and supporting teachers
3. Continuous Quality Improvement (CQI)
4. Presentation of outcomes with automated mind mapping

Facts and Figures

Gender inequality persists worldwide, depriving women and girls of their basic rights and opportunities. It has been repeatedly proven that empowering women and girls has a multiplier effect and helps drive up economic growth and development. Achieving gender equality will require greater efforts, including legal frameworks, to counter deeply rooted gender-based discrimination that often results from patriarchal attitudes and related social norms.

At its most basic level, gender equality is simply about ensuring that both genders have access to the same opportunities at an economic, sociological, health-care and educational level. It is about the same behaviours and needs being valued, acknowledged and respected equally – regardless of gender.

Fighting gender inequities, including violence against women, will help achieve health targets.

What you think about this goal?

How you can resolve this issue in five steps?

Facts and Figures

Access to safe water and sanitation and sound management of freshwater ecosystems are essential to human health and to environmental sustainability and economic prosperity. Today, water scarcity affects more than 40 percent of people around the world, and this figure is projected to increase with the rise of global temperatures as a result of climate change. Ensuring access to safe and affordable water will require investing in adequate infrastructure and sanitation facilities, supporting water efficiency and treatment technologies, and rational use of water-related ecosystems.

Safe water and sanitation for all will greatly contribute to disease prevention.

A safely managed drinking water service is defined as one located on premises, available when needed and free from contamination. Goal: By 2030 achieve universal and equitable access to safe and affordable drinking water for all.

Improve sanitation facilities by providing toilets and latrines that flush into a sewer or safe enclosure. Promote good hygiene habits through education. Proper hand washing with soap and water can reduce diarrhea cases by up to 35 percent.

What you think about this goal?

How you can resolve this issue in five steps?

Facts and Figures

As the global population continues to rise, so will the demand for cheap energy. A global economy reliant on fossil fuels and the increase of greenhouse gas emissions is creating drastic changes to our climate system. Efforts to encourage clean energy has resulted in more than 20 percent of global power being generated by renewable sources. Still, one in seven people lack access to electricity, and progress in every area of sustainable energy falls short of what is needed to achieve energy access for all and to meet targets for renewable energy and energy efficiency. Meaningful improvements will require higher levels of financing, bolder policy commitments, and the willingness of countries to embrace new technologies on a much wider scale.

Promoting sustainable energy will be key to healthier homes and lives.

What you think about this goal?

How you can resolve this issue in five steps?

Facts and Figures

Over the past 25 years, the number of workers living in extreme poverty has declined dramatically and the middle class in developing countries now makes up more than 34% of total employment. However, we are now seeing slower growth, widening inequalities and not enough jobs to keep up with a growing labour force. Increasing labour productivity, reducing the unemployment rate, especially for young people, and improving access to financial services and benefits are essential components of sustained and inclusive economic growth, as are effective measures to eradicate forced labour, slavery and human trafficking.

Economic Growth: Economic growth is achieved by increasing the economy's ability to produce goods and services. This goal is best indicated by measuring the growth rate of production. If the economy produces more goods this year than last, then it is growing.

What you think about this goal?

How you can resolve this issue in five steps?

Facts and Figures

Investment in infrastructure and innovation are crucial drivers of economic growth and development. With over half the world population now living in cities, mass transport and renewable energy are becoming ever more important, as are the growth of new industries and information and communication technologies. More than 4 billion people still lack access to the Internet. Bridging this digital divide is crucial to ensure equal access to information and knowledge, and foster innovation and entrepreneurship. Promoting sustainable industries, and investing in scientific research and innovation, are all important ways to facilitate sustainable development.

What you think about this goal?

How you can resolve this issue in five steps?

Interaction with SDG 3

Health for all will greatly benefit from promoting national R&D capacity and manufacturing of affordable essential medical products

Facts and Figures

Income inequality is on the rise, with the richest 10 percent earning up to 40 percent of total global income. In developing countries, inequality has increased by 11 percent if we take into account the growth of population. Income inequality is a global problem that requires global solutions. These include encouraging the adoption of policies to empower the bottom percentile of income earners, development assistance and foreign investment to regions where the need is greatest, and facilitating the safe migration and mobility of people.

What you think about this goal?

How you can resolve this issue in five steps?

Interaction with SDG 3

Ensuring equitable access to health services through universal health coverage and a stronger primary care will directly contribute to achieving SDG3.

Facts and Figures

By 2030, two thirds of the world population (5 billion people) is expected to live in cities. Rapid urbanization has brought enormous challenges, including growing numbers of slum dwellers, increased air pollution, inadequate basic services and infrastructure, and unplanned urban sprawl, which also make cities more vulnerable to disasters. Making cities safe and sustainable means ensuring access to safe and affordable housing, investment in public transport, creating green public spaces, and improving urban planning and management in a participatory and inclusive manner.

What you think about this goal?

How you can resolve this issue in five steps?

Interaction with SDG 3

Health will greatly benefit from fostering healthier cities through urban planning, cleaner air and more active lifestyles.

A collage of colorful icons representing various aspects of sustainable development. The icons include: a yellow bowl with steam (food), a pink circle with an equals sign (equality), a blue water drop (water), a green tree (environment), a blue bird (nature), a blue gavel (law), a red book and pencil (education), a yellow sun with a power button symbol (renewable energy), a green eye with a globe (environmental awareness), a yellow infinity symbol (circular economy), a yellow female symbol with an equals sign (gender equality), orange buildings (urban development), a green heart with a pulse line (health), a blue flower (nature), a blue fish (oceans), a red family silhouette (community), a blue wave (water), a red bar chart with an upward arrow (economy), and a circular graphic with binary code and an arrow (technology).

Facts and Figures

There is no country in the world that is not experiencing first-hand the drastic effects of climate change. Greenhouse gas emissions continue to rise, and are now more than 50 percent higher than their 1990 level. The annual average losses from tsunamis, tropical cyclones and flooding amount to hundreds of billions of dollars. The goal aims to mobilize \$100 billion annually by 2020 to address the needs of developing countries and help mitigate climate-related disasters. Mitigating climate change and its impacts will require building on the momentum achieved by the Paris Agreement on Climate Change, which entered into force on 4 November 2016. It is still possible, with the political will and a wide array of technological measures, to limit the increase in global mean temperature to two degrees Celsius above pre-industrial levels.

This goal is inextricably linked to SDG 3, and involves protecting health from climate risks, and promoting health through low-carbon development.

What you think about this goal?

How you can resolve this issue in five steps?

[illegible]

Facts and Figures

Over three billion people depend on marine and coastal biodiversity for their livelihoods. However, 30 percent of the world’s fish stocks are overexploited, reaching below the level at which they can produce sustainable yields, ocean acidification has risen 26 percent since the beginning of the industrial revolution, and an average of 13,000 pieces of plastic litter are found on every square kilometer of ocean. This goal aims to sustainably manage and protect marine and coastal ecosystems from pollution, as well as address the impacts of ocean acidification. Enhancing conservation and the sustainable use of ocean-based resources through international law will also help mitigate some of the challenges facing our oceans.

Supporting the restoration of fish stocks to improve and diversify healthy diets is one example of how this goal can help achieve SDG3 targets.

What you think about this goal?

How you can resolve this issue in five steps?

Facts and Figures

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification and halt and reverse land degradation and halt biodiversity loss

Plant life provides 80 percent of our human diet, and we rely on agriculture as an important economic resource and means of development. Forests provide vital habitats for millions of species and important sources for clean air and water, and are crucial for combating climate change. Progress in preserving and sustainably using the Earth's terrestrial species and ecosystems is uneven. Declining trends in land productivity, increasing drought and desertification, and poaching and trafficking of wildlife remain serious concerns. Urgent action must be taken to reduce the loss of natural habitats and biodiversity, which are part of our common heritage.

What you think about this goal?

How you can resolve this issue in five steps?

[illegible]

Facts and Figures

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

Progress promoting peace and justice, together with effective, accountable and inclusive institutions, remains uneven across the world. While some regions enjoy sustained levels of peace, security and prosperity, others fall into seemingly endless cycles of conflict and violence. Sexual violence, crime, exploitation and torture are also prevalent where there is conflict or no rule of law, and countries must take measures to protect those who are most at risk.

Strengthening the rule of law and promoting human rights is key to this process, as is reducing the flow of illicit arms and strengthening the participation of developing countries in the institutions of global governance.

The implementation, monitoring and accounting for ambitious national SDG responses, including SDG3, will require empowering strong local institutions.

What you think about this goal?

How you can resolve this issue in five steps?

Facts and Figures

Strengthen the means of implementation and revitalize the global partnership for sustainable development.

All the goals of SDGs can only be achieved with a strong commitment to global partnership and cooperation. The world today is more interconnected than ever before. Improving access to technology and knowledge is an important way to share ideas and foster innovation. Coordinating policies to help developing countries manage their debt, as well as promoting investment for the least developed, is vital to achieve sustainable growth and development. The goal aims to enhance North-South and South-South cooperation by supporting national plans to achieve all the targets.
